Introduction

Cornea Research Center of Mashhad University of Medical Sciences has started working in the year 2012 with the aim of conducting original research and organizing ophthalmic diseases associated with anterior segment of the eye, particularly the cornea.

The center relies on the ability of Ophthalmology Faculty of Mashhad university of Medical Sciences and existing infrastructure to support research, tries to expand the frontiers of knowledge in the field of ophthalmology and genuinely tries to help localization and self-sufficiency of the Islamic homeland.

Cornea Research Center of Mashhad University of Medical Sciences attracted researchers from outside the work group and the organization welcomes and is open to research ideas.
